Army Orders.—January, 1917.

A.O. 29 4. The concession in paragraph 2 will not apply, in
1917 the absence of special War Office authority, to those
continued. whose services are terminated on account of misconduct
and to those who voluntarily resign prior to the
termination of hostilities.

5. Any claims admissible under paragraph 2 should,
in the case of officers and nurses who, prior to retire-
ment, &c., have been drawing allowances from a pay-
master in the United Kingdom, be submitted to that
paymaster; in the case of those who arrive in this
country from abroad they should be submitted to the
Command Paymaster, Eastern Command, except in the
case of those serving on hospital ships plying between
the United Kingdom and the Mediterranean, when
they should be submitted to the Embarkation Pay-
master, Southampton.

6. The above regulations will hold good for the
remaining period of the war and for 6 months after-
wards, and during that period paragraph 313 (c),
Allowance Regulations, will be read as if "and to" in
line 4 were *omitted*. Paragraph 313 (i) will be in
abeyance.

A.O. 30. Attestations.—1. It has been decided that dupli-
1917. cate Attestations for men who enlist for the duration
of the war and duplicate Record of Service Papers
(Army Form B 2513) shall not, in future, be prepared
or kept written up.

In place of these duplicate forms, Army Form B 103
will be prepared for every man, whether he is serving
at home or abroad.

2. Attestations for normal periods of enlistment will
continue to be made out in duplicate as heretofore, but
during the continuance of the war both original and
duplicate will be sent to, and kept written up by, the
officer i/c records.

3. Army Form B 103 will be prepared at the same
time as the Attestation (or Record of Service Paper),
and will be forwarded to the officer commanding the
unit to which the man is posted.

4. In cases where duplicates of the forms mentioned
in paragraph 1 already exist, they are to be sent for
safe custody to, and retained by, the officer i/c records.
Army Form B 103 will, however, be prepared from
them before despatch.

Army Form B 103 will be prepared by the officer
holding the original Attestation in cases where a

duplicate Attestation, duplicate Record of Service Paper, or Army Form B 103 does not exist. It will then be forwarded to the officer commanding the unit with which the man is serving. A.O. 30

continued.

5. Applications to officers i/c records for Attestations must be reduced to a minimum. For courts-martial purposes, Army Form B 296 will be prepared from Army Form B 103.

6. During the continuance of the war duplicate Attestations will not be taken overseas by any unit. Arrangements should be made to recall any in the possession of units now serving overseas. The officer commanding the unit will, however, see that Army Form B 103 is prepared from them before they are despatched.

7. The following regulations are modified during the continuance of the war by this Army Order:—

King's Regulations, paragraphs 384, 1902—1904, 1908—1911, 1929.

"Regulations for Recruiting, 1912," paragraph 113.

"In the case of coast defence guns which, in war, are kept loaded, bores are not to be lubricated or wiped out from the muzzle, as there is the liability of a ring of lubricant being left at the extreme point reached, which may cause a premature. Such guns may be unloaded when required, such as for the purpose of cleaning the bore, by the use of a special ejector, carefully improvised under local arrangements, provided all reasonable precautions are observed, e.g.—

A.O. 35.
1917.

(a) The whole procedure should be carried out under the strict supervision of a responsible officer.

The cartridge and tube, if in the gun, will be first removed.

(b) The ejector head should be hollowed out so as to give plenty of clearance radially and longitudinally to the fuze. Lashing or guy ropes should be fastened to the ejector, so that pressure can be applied without the ejector being actually handled. (A drawing of a typical form of ejector has been issued with A.C.I. No. 2129 of 1916.)

(c) Only steady pressure must be applied. The shell must not be knocked or hammered with the ejector or by any other means.

In the case of 9·2-inch guns, it will facilitate a straight pull being obtained if the gun is depressed.

(d) During the operation the breech should be closed, a large pad of soft material being first placed in the chamber to prevent the shell moving more than a few inches.

(e) As soon as the shell has started, the breech can be opened and the shell steadily pushed out. Special care must be taken to ensure that the shell is not dropped in the process of removing it from the breech.

As the bores of loaded guns must on no account be lubricated or wiped out, guns which must be kept loaded may, where considered desirable, be loaded with a plugged shell, or an A.P. shell, if such are available locally. There is no objection to unloading such a shell, and as the first round fired is usually in the nature of a ranging round, the question of its not bursting is not very material.
